TEAM PHOTOGRAPH

Thomas Liem

TECH

Builds the whole app, the tool and everything around it.

Wei Le

PRESENTATION

Runs the demo, and covers the UI, UX, docs, and pitch deck.

WHO WE ARE

SihatAI

THE PROJECT

A scan, a lab report, and a symptom usually show up separately.

SihatAI turns them into one report the doctor can check and the patient can read. The language stays plain, so the report can be understood easily even without special medical knowledge.

CHALLENGE TRACK

T2 AI for Healthcare & Medical

MAIC Nexus Challenge

WHY WE JOINED MAIC

Malaysian clinics are short of specialists. Scans and lab reports pile up, and patients often leave without knowing what the report means. We joined this track to work on that problem.
